

Importing The Asset

Create a New Empty Project

Open Unity Hub and create a new **empty** project.

1. New project
2. Make sure the selected editor version is 2019.4.0 LTS or higher
3. Select 2D (Core)
4. Enter your project name
5. Select the save location
6. Create project

Install DOTween

Core Trivia uses DOTween to create smooth transitions and animations. Before importing Core Trivia, you need to import [DOTween](#) (FREE) or [DOTween Pro](#) into your project.

Install Core Trivia

Once you have imported and setup DOTween, import Core Trivia.
